Work study: Work study as defined by British Standard Institution (BSI) in a generic term for those techniques particularly, Method study & work measurement. When are used in the examination of human work in all its contexts & which leads systematically to the investigation of all the factors which effect the efficiency of the situation being reviewed, in orders, seek improvements.

Concept: Work study investigates the work done in the organization and its aims at finding the best's most efficient way of using a available resources, man, materials, money & machinery. The required to manufacture an item depends upon the manufacture procedure and one phase of work study known as method study.

Procedure: To determine the best method of performing each operation & to eliminated wastage, so that production increases with loss fatigue. For determining the standard time that a qualified workers should take to perform the operation where working at a normal face.

Advantages of work study:

1. Uniform & improved production flow.
2. Higher productive efficiency.
3. Reduced manufacturing costs.
4. Fast & accurate delivery dates.
5. Better employee-employer relation.
6. Better service to customers.
7. Job security & job satisfaction to workers.
8. Better working & other condition.
9. Higher wages to workers.

Time study / Work measurement: It may be defined as the application of different techniques to measures and establish the line required to complete to the job.

Defined as the art of observing & recording the time required to do each detailed element of an industrial operation. It includes manual mental and machinery operation.

Concept & Procedure: The various steps involved are as follows :

1. Establish the quality to be achieved in the product strike a balance between a low & very high quality. Low quality means more rejection & scrap and very high quality mark uneconomical production.
2. Identify the operations to be timed.
3. Obtain the improved procedure from the method study department.
4. Collect the necessary equipments & ensure the accuracy.
5. Select the worker to be observed.
6. Take the workers as well as supervisor into confidence & explain to them the objective at the project.

The different objectives of element breakdown are as follows.

1. To separate productive and of upon productive & activities of effective & idle times.

2. To get accurately operation information.
3. To access accurately operators performance.
4. To produce detailed work specification.
5. To select the best method by comparing the work elements of two or more given methods.

Aim of time study:

1. To save time of individual worker.
2. Effective utilization of minutes.
3. To eliminates the index human resources.
4. To reduces the grouping of workers.
5. To help the salary administration.

Advantages of time study / work measurement:

1. Determining the time required to do a job, thus it compares alternative methods & establishes the fastest method.

3. Decides equipment requirements.
4. Provides information for effective production planning and maintenance produces.
5. Aids in calculating exact delivery date.
6. Decides realistic labour budgeting & provides a bases for standard costing system.
7. Provides a basic for fair & sound incentives schemes.
8. Results in effective labour controls.

Motion Study / Method study: Analysis of an operation, when carried out in term of individual motion of a worker is known as motion study or motion analysis.

The purpose of motion analysis into design is improved method which eliminate unnecessary motions and employees human effort more productivity. In doing so the principles of motion economy prove to be very helpful.

Motion study aims of finding the best possible manufacturing procedure involves least time & does not cause fatigue to the workers or in brief method study or motion study aims at finding the best way of doing a job.

Defined as the systematic investigation i.e. recording & critical examination existing method of doing job in order to develop & metal on easy rapid efficient.

Procedure of motion study:

1. Select the work worth studying and define the objectives to be achieved.
2. Record all the relevant information pertaining to the existing method in details.
3. Examine the recorded events critically & in sequences, critical examination involves answer to a no of questions. An activity can be eliminated, simplified or combined with another. The basic question are

Purpose-What is done? Person-Who does it? Place-where it is done? Means-How it is done?

4. Develop the best method as resulted from critical examination & record it.
5. Install the best developed method, which involves three phases, namely, planning, arranging and implementing.
6. Maintain the new method i.e. ensure the proper functioning if the installed method by periodic checks & verifications.

Advantages of motion study / method study:

1. Improved working processes and standardization procedures.
2. Better workplace layout, neat & clean environment and working condition.
3. Less Fatigue to operations.
4. Better product quality.
5. Effective utilization of men materials & machinery.
6. Efficient & fast material handling.
7. Reduced health hazards.
8. Efficient planning of the section.
9. Stream lined working procedures.

Aims of motion study:

1. To eliminate wastage of time and labour.
2. To find all the best ways of doing it.
3. Better working place, layout, neat & clean environment.
4. To reduce fatigue by avoiding unnecessary movement.
5. Better product quality.
6. Efficient and fast material handling.
7. To train the individual worker.

11.0 Define wage, nominal wage, real wage, living wage, minimum wage, fair wage & fall back wages (Definition as per Mines Act & Rules).

Wage: It is the payments made by the employer for the efforts put in by the workers in production. It is payment made for the service rendered by labour.

Wages includes all remuneration payable to an employee in respect of his employment.

Aggregate earning of a person on a given period of time may be daily or weekly or monthly.

Nominal wage: It is also called money wage, when the wage and form of money then it is called nominal wage. It is the amount of money paid to the workers in each cash for week on an industry and no other advantages to the worker is made. The nominal wage is may differ at different places as per the availability of workers and necessary of the life. The amount thus paid is so calculated that every worker should get actual worth.

Real wage: It refers to the amount of necessary comforts, luxuries & cash payment which a worker can get in return for his effort and work.

For Example, Uniforms, essential commodities, housing with free water & electric supplies, conveyances and other such facilities are generally provided by the factory in addition to be many in cash. This entire amount as a whole is considered for wages, this becomes "Real Wage".

Living wage: When the rate of wages are such that they can most some of the requirement of family like education, cloth, food and insurance against more important things along with prime necessities of life are called living wages. It fulfills the bare physical need.

Minimum wage: It is defined as the wage not only free base substance but something more than thing. It should be sufficient for the worker to maintain himself according to the need and be sufficient to the preservation at the efficiency of the worker. It must also provide for some measure of education mineral equipment and other amenities of life. Fixing minimum wage cost is living must be considered.

Fair wage: It is actually the wage which must be fair for the work of a worker and should provide him with other necessities of life in addition to find for his family.

Fall back wage: In case the worker fail to fulfill the worker they are not responsible i.e. short temporary power failure. They are cut off their wage equal to minimum wage for special work.

11.1 Discuss essential of good wages system.

The wage system is very much simplicity that every body can understand it.

1. It should be very comical or simple.
2. Wage system will not fluctuation it must be stable or flexible.
3. Minimum wages cost in guaranteed.
4. A good wage system should not have any wage limit.
5. Scientifically fixed the standard.
6. Wide coverage.
7. Scope for growth.
8. The system should be fair both to the employees and the employer.
9. Productivity of labour.

10. Provision of overtime.
11. Wage system must be national ore.
12. Wage system should risk with job.

Method of wage system:

1. Time rate method
Wage (W) = Time (T) X Rate (R)
2. Piece rate method
Wage (W) = Piece (P) X Rate (R)

12.0 State basic concept of incentives.

Incentives: It is something that encourages a worker to put in more productive efforts voluntary. Mostly workers are not willing to exert themselves to produce any where near their full capacity unless their interest in work is created by kind of reward, this is called incentives.

The incentive is a kind of monetary reward which is closely related to the performance of a worker, resulting increase in wages corresponding to an increase in output.

Basic concept of incentives: Incentives is an inducement or reward which is given to a worker for his efficiency and hard work. Incentives motivate and encourage a worker to produces more & better. Incentives are in addition to the job hourly rate & are in same proportion to the workers contribution towards production.

Incentives may be classified as a direct incentives & indirect incentives and financial, non financial and semi financial incentives.

Besides incentives in the immediate work contribution, worker may receive additional financial benefits in the term of Bonus, Profit sharing.

Types of incentives:

1. **Financial incentives :** If an employer finds that he will be earning an extra profit Rs. 25, if a particular work in finished in 5hr, less than the prescribed time. Now, if the workman is promised on extra payment of Rs. 10. This extra payments is known as financial incentives.
2. **Non financial incentives :** Non financial incentives includes.
 - (i) Job satisfaction.
 - (ii) Better & healthy working condition & surrounding.
 - (iii) Chances of promotion.
 - (iv) Job security.
 - (v) Helpful & co-operative management.
 - (vi) Respect & recognition in the organization.
 - (vii) Training & other employee improvement programme
3. **Semi financial incentives:** Semi financial incentives includes.

Provision of subsidized luncher creational and medical facilities to the worker and subsidized education facilities for their children.

4. **Direct incentives:** Direct incentives are those which are given to an individual workers to his own contribution for the organization.
5. **Indirect incentives:** Indirect incentives are paid to group workers for their contribution.

Advantages of incentives systems:

1. Workers are encouraged to increase production to earn more.
2. Workers day wages are guaranteed even if they are unable to complete the job in standard time, incentives is earned.
3. This promotes relation between employee & employer.
4. Cost of supervision is reduced as workers themselves are motivated to work hard and improve performance.
5. A spirit of mutual co-operation and team work is created among work.
6. These help to improve discipline & industrial relations.
7. Employees are encouraged to become innovative.

13.0 State meaning of industrial psychology working condition & environment.

It is the duty of the management to create and maintain a sound working environment for all the workers inside the organization. Better working environment includes both the creation. Better working conditions and healthy atmosphere both physical and psychological. The general environment inside the organization should help to maintain sound mental and physical health of the workers with good moral for higher productivity. Better performance and productivity largely depend on improved working conditions.

Apart from providing all the physical facilities for better performance, the management should take care of the psychological factors of the employees into consideration. If adequate attention is focused on this aspect it will not only increase productivity but also ensure efficient and proper utilization of all the available resources. It will reduce idle time, accidents, injury, mishandling, defective work, damages, wastes, etc. the management should create a better work environment, so that the workers feel a sense of belongingness, security and shall be proud to work. Their mental stress, strain and fatigues should be taken care of.

Better working conditions reflect the quality and quantity of their performance. The workers should try to put their best for attainment of their own target, group target and help to reach the ultimate goal of the enterprise.

Better work environment changes the attitude of the workers where efficient workers shall try to become more efficient and average or inefficient workers shall try to increase their efficiency to be categorized as efficient workers.

Attitude of the workers towards management and working conditions is the most dominating factor in achieving efficiency.

Better remuneration, bonus, allowances, higher promotion prospects, better housing, better medical facilities, better conveyance, better education facilities for children, better canteen facilities, provisions for entertainment, refreshments like tea and coffee, prizes, honour, club membership, better machinery, tools, equipments, lighting, ventilation, drinking water, cleanliness, fans, air-conditioners, air-coolers, bath-rooms, urinals, lavatories, rest rooms, adequate open space, dust fumes and sound management, etc. create better working conditions.

14.0 Develop concept about trade unions & their function.

Trade union : Trade union is a voluntary association of the employees of an organization formed to protect their rights and safeguards\ their interest against the exploitation of the employer. Due to rapid industrialization, the importance of trade union has increased and has established itself as an inseparable wing of the industrial society. So the trade unions are organized by workers themselves to solve their problems. An individual worker cannot enforce his rights against the powerful employer. But, if a group of workers unite together can gather strength and courage to raise their voice against the employer to enforce their rights.

Trade unions are aimed to solve labour related problems and to safeguard, promote and protect interest and rights of the workers through proper negotiation or bargaining with the employer in a collective manner. Trade union is an organization of workers to play the role of a collective bargaining agent for the benefits of the workers. Trade unions bargain and negotiate with the employer regarding all matters relating to the employment of the workers. Trade union is a human machinery formed by the workers for the purpose of promoting and protecting the rights of the workers and acts as a check of unfair practices by the employers.

Function of trade union: It is generally understood that the main function of a trade union is to fight with the management on various labour related issues and organize strikes, protests, gherao and bargain with the employer for their rights. But, nowadays, trade unions have a lot of role to maintain a healthy industrial and social relation in and around the factory.

The trade unions perform the following functions:

1. The trade unions try to settle disputes arising between employer and employees on various issues on a mutual basis.
2. It works for securing better working environment for the workers.

3. Trade unions try to secure better wages for the workers and force the employer for revision of the wages at time intervals.
4. It acts as a security agency to safeguard the workers against any form of exploitation.
5. It has to check the unfair labour practices of the employer.
6. Trade unions work to ensure better health, safety and proper working condition in the work field.
7. Trade union try to settle any dispute arising between workers and workers and management and workers through peaceful negotiations.
8. Trade unions also act as an advisory body on various labour related matters to avoid any disputes and to maintain industrial peace and harmony.
9. It tries to create a good social relation of the organization and its workers with the people in general.
10. One of the major functions of the trade union is to increase the status of the organization through increase in production, productivity, maintaining quality and provide better services to the customers to establish and maintain a strong goodwill of the organization and its products.
11. It works to increase the status and standard of living of the workers through various social security and labour welfare measures.
12. Trade unions take steps to resolve conflicts among workers, departments, sections, and units of the organization.
13. Trade unions functions to create awareness among the workers to promote trade union culture in industries.
14. Trade union functions as the middleman between the employer and employees to sort out their differences to maintain a cordial relationship.
15. Trade unions ensure a share in the profits of the organization for the workers in the form of bonus.
16. Trade unions promote the culture of workers participation in management which is fruitful in building better industrial climate.
17. Trade unions create awareness among the workers about their rights and duties as well as the measures to enforce them.
18. It acts to provide equality and justice to the workers through various measures.
19. Trade unions raise voice against corruption, malpractices, unfair trade practices, illegal lock-outs, discrimination, etc.
20. Trade unions function to maintain discipline both inside and outside the organization by creating and maintaining industrial peace and harmony among all the persons.

15.0 State main provision of Industrial disputes Act-1956.

Causes of industrial disputes :

1. Economic Causes. 2. Non-economic Causes.

Economic causes :

1. About 40% of the industrial disputes in India are for increasing the wages of the workers. Workers demand more wages due to increase in the cost of living, increase in the price level, increase in their standard of living.
2. Due to the increase in the prices of essential commodities and services, workers demand more dearness allowances at frequent intervals.

3. Payment of bonus is also a major cause of industrial disputes in India. This bonus is paid on the basis of profits earned by the organization.
4. Workers are more conscious about their service career. They may demand better promotion facilities to higher posts, better financial increments, advancement in grades etc.
5. Due to change in the industrial climate and due to the advancement of science and technology, the employer may be interested to reduce the cost, increase the efficiency by bringing automation and modernization to the operations.
6. Workers from time to time demand many facilities and amenities, such as, better medical facilities, transportation facilities, canteen facilities, children education facilities, facilities for pension, gratuity, leave travel concessions etc.

Non-economic causes:

(A) Physical Causes:

1. Workers nowadays are more concerned about their health. Safety and better working environment. Very often, they demand better working conditions which is generally poor in almost all the industries.
2. Sometimes, the workers demand essential items like, safety shoe, goggles, aprons, hand gloves, helmets, dresses etc for performance of their duties.

(B) Psychological Causes :

1. Unlawful lay-off and retrenchment.
2. Disobedience of discipline.

6. Non-recognition of seniority and merit.

(C) Organizational Causes :

1. Non-recognition of unions.
2. Defective leadership of union, where the workers may agitate to drive out lazy union leaders.
3. When the workers are affiliated to a particular political party, they have to follow the guidelines of the party, so far opposing the organization on various issues.

(D) Other Causes :

1. To extend support to other union or organization for strikes etc.
2. Changes in the rules and regulations.
3. Lack of communication and or miscommunication.

Function of entrepreneur :

1. Entrepreneur manage business, take decision.
2. He studies the market and select the business.
3. He makes a selection of plant side and location.
4. He organizes the sales and hold customer.
5. He promotes new invention.
6. He Co-ordinates different factor of production.
7. He arranges raw material machinery and equipment.
8. He deals with Govt. agencies.
9. He decided pricing policy that's entrepreneur is risk taker.

Controlling :

Controlling process is extended for achieving objects at an enterprise. It involves.

- Setting standard of performance.
- Measuring actual performance.
- Comparing actual performance with standard performance.
- Finding the deviation.
- Taking corrective action.

Concept of management :

Management may be collect the art of getting done through people with satisfaction for employer, employees and the public.

For getting the work done through the efforts of other people. It is necessary to guides direct, co-ordinate and control human efforts towards the fulfill of the goals of the enterprises.

Management has scientific base in because management techniques are susceptible to measurement and factor determination.

Management is an art because management means coordinating and getting work done through others.

Management is an executive function which activity directs human efforts towards common goals.

The main characteristic of the management is to integrate and apply the knowledge and analytical approach developed by numerous other disciplines.

Management does not frame policies it only complements executives the policies laid down by administration.

The functions of management are executive and largely governing.

Management is the servant of administration it get salary.

Essential characteristic of a good wages systems :

A good wages system should have the following characteristic.

1. This should guarantee an adequate minimum wages.
2. It must have the free consent of the workers.
3. It must reward the worker according to his capacity & merits.
4. It must be simple in its working, so that it may be readily understand by its workers.
5. It must not involve heavy clerical work and there by increase the ultimate cost.
6. It should aims at increasing production without adversely affecting quality.
7. It should reduce wastage of material and careless use of paint, tools and equipments.
8. It should have effectively supervision but it should not be too heavy.
9. Incentives, bonus etc. should be payable along with the wage & not put off for future.
10. The system should fair both to the employees and the employers.

SN	LINE ORGANISATION	STAFF ORGANISATION
1	Line executive function is to act.	Staff executive function is to think.
2.	Line officer are assigned and authority to command.	Staff officers are appointed and authority to idea.
3.	Line represents the authority of men.	Staff represents the authority of ides.
4.	Line peoples are doers.	Staff peoples are thinker.
5.	Line executive must be take care that while receiving and advice from staff he must regarded it an advice and not end command.	Staff executive must recognize that his job is to consult.

Staffing :

It means requirement selection, placement training and development of personal and developing system for remuneration (wages, salary of employment) of personal and evolution their performance.

Essential of sound motivation :

- Good wages.
- Good financial incentives scheme.
- Opportunity for achievements, growth and promotion.
- Human relation.
- Job satisfaction.

Who is employer :

Inflations to ordinarily carried on by or under the authority along department of the Central Govt or State Govt. The authority as prescribed on this be half or no authority is prescribed the head in the department.

Small scale industry :

An industry is said to be small scale industry if its investment in fixed assets like plants, equipment isles than 10 million, then the industry is known as small scale industry.

Meaning of taxation :

Taxation is the composition of a mandatory levy on the citizens and the business of a country by their Govt.

Difference between wage and incentives :

Wage is the initial price paid to the labour for the effort put in by him in production where as incentives is the regard which is given to a worker for his efficiency and hard work.

What is minimum wages :

Minimum wage is determined by Govt. Employers cannot pay less than the described wages notified by Govt. The state Govt. has to fix minimum rate of wage for different categories of workers for different industries. The minimum wages is paid only in cash.

Minimum wages covers the bare necessity of life, such as provision for food, shelter and clothing. It does not take into account any provision for health, education and efficiency of workers.

Failure of a small scale industry :

1. Capital investment is small. The investment in plant and machinery must not exceed Rs. 100 lakhs or Rs. 1 crore as per Govt. of India notification 1999. They are generally labour incentives.
2. Generally engaged in the production of light consumer and electronics goods or engaged in small scale services and business enterprises.
3. Mostly all of these firms are privately owned and are organized as sole proprietorship.
4. Location in rural and semi-urban areas.
5. fixed assets form the longest component of small units.
6. Exploitation of natural resources is another features of small scale industry.
7. Small scale industries are quality conscious.

What do you mean by inventory :

Inventory is the total amount of goods and material contained on a store or factory at any given time.

What is cost of living index :

No indicate through there movement whether wages are rising of falling money wages remaining the same. They some may assist is granting extra allowance to employer to meet the increased cost of living.

What is long term planning :

Long term planning is defined as to meet future need estimated usually by extrapolation of known needs.

Distinguish between strike and lockout :

A strike is a temporary work stoppage effected by one or more groups of workers where as a lockout is a total or partial temporary closure of one or more places of employments.

Why fallback wage is given to the mine workers :

The fall back wage is given to the mine workers, in case the worker fails to fulfill the work they are not responsible, short supply of tub break down of haulage, temporary power failure. They are cutoff to receive fall back wages.

What is the function of organization :

Organisation is the pattern of way in which a large number of people engaged in a complexity of task relate themselves to each other in systematic establishment and accomplishment of mutual agreed purposes.

What is fatigue study :

Fatigue study seeks to determine the amount and frequency of rest interval required in completing the task.

Explain the importance of human relation in labour management and needs for correct attitude of employer to employee :

In modern time it is recognized that a worker should be given humanity treatment at work to avoid troubles and free advance the enterprise such treatment, should be based on mutual co-operation in the solution of common problems, it should be realized that in employees are not only able to work but wellness to carry as well. The wellness largely based on management ability to center the interest and need of its employees with the objective of organisation such as integration in terms as human relation approached human relation in industry are delivered as the optimum relation between maximum productivity and maximum satisfaction and thus getting co-operation at works on the industries.

Define planning in management techniques :

Planning is a process which involves thinking before doing. It helps to determine the course of action to be adopted for achieving various organizational objectives.

What are the principles of sound organisation :

1. Relationship of basic components of organisation: Objectives are decided 1st step determine types of work to be performed and type of work indicates personnel and physical facilities.
2. Principle of unit and objective : The organisation is a mechanism to achieve the business. The objective must be clearly defined for the entire enterprise, for each department and for each position in the organisation structure.
3. Span of control : The number of persons who are directly to the executive is called span of control. Factors determining span of control :
 - Capacity, experience and skill of the subordinates.
 - Capacity and skill of the executives.
 - For specialized and routine work span of control can be large.
 - A span of control is also ideal when a number of workers are working in the isolated area doing different types of work and require close supervision and control.
4. Principle of communication : The term communication is derived from the Latin word that is *communis* which means communication. It is the process of passing information and understanding from one person to another person and it is a breeze of communication.
5. Principle of unit of command : Employee should receive order and instruction from one boss. Unit of command states that an individual should receive order from one superior and report directly to one superior only.
6. Principle of scalar chain : Manager should be regarded as chain of superior from highest to lowest rank a subordinate should follow line of authority.
7. Principle of balance : There should be balance between authority and responsibility. There should be balance between standardization and procedure flexibility. There should be balance between centralization and decentralization. There should be balance

between span of control and short chain of command. Principle of relation between authority and responsibility.

Co-ordination :

Co-ordination orderly arrangement of group of effort, to provide a unit of action in pursuit to common people.

1. Internal co-ordination : Coordinating with internal people or department and other part of enterprises. Ex. Employment of different department, supervisor, manager, director and other personnel.
2. External co-ordination : Coordinating with external department such as customer, dealer, society, Govt. and other out sides agency.
3. Vertical co-ordination : coordinating from top level to bottom level or bottom level to top level for attending common objective of the business that is called vertical co-ordination.
4. Horizontal co-ordination : Where activities of different department such as purchase, sales, accounts, finance act together is called as horizontal co-ordination.

Tools of co-ordination :

1. Clear cut objectives.
2. Effective communication between executives and subordinate, supervisor, or workers.
3. Good human relationship of the manager with their subordinate.
4. Co-ordination amounts subordinate and executives.

Communication :

The term communication is derived from latin words that is communies which means & communication. It is the process of passing information and understand from one person to another and it is a breeze of communication.

Method of communication :

4. Verbal communication and written communication.
5. Formal & informal communication.
6. Downward, upward and horizontal communication.

Verbal communication : In the case of verbal communication everything is oral. Example of verbal communication, face to face task, telephone task, social gathering, conference, interview, audio, video.

Written communication : They are always in writing. It provides permanent records.

Formal communication : That is mostly in writing and with generally associated with particular position communication centre, general instruction, general information provides their subordinate.

Informal communication : When He looked my face then we both smile to each other.

Downward communication : It is transmission or instruction and information from the top executive to lower grade employee means workers.

Upward communication : Information moves from subordinates to superior officer. It is transmission of message from lower grade employee to top executive.

Need for correct attitude to employer :

Poor industrial relation badly affect worker, which has the following consequences.

- Growth of mutual conflux.
- Increase in complain and grievances.
- Generation of indiscipline.
- Increase in absenteeism.
- This regard to rules & law.
- Increase in break down and accident.
- Hall in production.

Management should always be alert to see that good human relation between the workers administration and the management. The following measures should be taken for improving the human relation.

- Development of persons and social process by creating, common regulational and welfare facilities.
- Personnel counseling.
- Workers committee to discuss problem of mutual interests. Introduction of employee and hand broke, suggestion work.
- Effective mechanism for quick settlement of grievances and dispute.

Enterprise :
